At Ace Diversified Services, the safety of our customers and employees is our number one priority. As we face the changing threat of the spread of COVID-19/coronavirus, we have enhanced how we deliver this safety promise.

As always, we will continue to use **medical-grade disinfecting spray** as a step in servicing our portable restrooms.

Effective immediately we have added extra safety measures to how we serve and protect our customers and employees:

Cleaning Our Restrooms: An added concentrated four-in-one disinfectant as a final step in servicing our portable restrooms, including high touch areas like toilet seats, door handles, lock, and toilet paper holders. This alkaline pH product is effective at killing a wide range of bacteria and viruses.

Personal Protective Equipment: Trucks are being equipped with additional personal protective equipment required for our Service Technicians, including disinfecting products and disposable gloves.

Following CDC Guidelines: Restricted non-essential travel, implementing self-quarantining when necessary, and increasing the cleaning and disinfecting of common workspaces.

Using hand sanitizer properly:

- **Use a large enough amount of the sanitizer**
- **Rub the product for 30 seconds over the surfaces of hands until dry**

- **Wet hands (cold or hot water)**
- **Apply soap and scrub hands for 20 seconds**
- **Rinse well**

Proper handwashing techniques:

We are actively monitoring the situation and we are committed to following the guidance of the CDC and government officials. As always, Ace Diversified Services is here to support you by keeping your site safe and clean. We have ample supplies of hand-wash stations and hand sanitizer dispensers available for delivery to your site.

Sincerely,

Frank Almester - President
